

Xubin Dong

PROFILE

I'm a third-year IT student aspiring to become a Java developer and a full-stack developer. Currently, I am focusing on learning Java and related technologies, as well as frontend development. While I have a basic grasp of these skills, I know there's still much to learn.

SKILLS & LEARNING DETAILS

- **Java:** Core Java syntax
- **Data Structures & Algorithms:** Arrays, Linked Lists, Stacks, Queues, Trees, Graphs; Sorting and Searching algorithms, Recursion, Dynamic Programming
- **Frontend Development:** HTML, CSS, JavaScript, React basics, building small web pages and components
- **Databases:** SQL queries, table design, primary/foreign keys
- **Computer Networks:** OSI model, TCP/IP basics, HTTP/HTTPS, client-server communication
- **Operating Systems:** Processes and threads, memory management, file systems, basic OS concepts

I have a basic understanding of all the above knowledge areas and continue to practice and explore them in my spare time to deepen my understanding.

MY PROJECTS

In my first year, I discovered a passion for frontend development. I independently followed tutorials and created small web projects, which I have uploaded to my GitHub.

[Pizza Delivery Application \(React, Tailwind CSS, Redux, React Router\)](#)

[The-wild-oasis \(React, Styled Component, React Router, React Query\)](#)
